

"No human is limited..."

RESEARCHER/HEALTH WORKER

Background

Peter is a health worker in his community and also works for an **environmental and human rights advocacy** organization based in Mombasa, Kenya as a researcher. His day to day activities include researching the possible dangers that industrial wastes can cause to humans and the environment. He lives with his wife, two sons, and one daughter.

Technology Use

Peter uses a **laptop for work** daily, and a cellphone to communicate with colleagues as well as his family. He uses **dropbox** to store findings from the field, and uses **Skype** often to communicate with colleagues and partners.

Strengths

- He is aware of the risks that he faces if he does not take steps to protect his accounts.
- He uses **2fa on Facebook and Gmail** accounts to keep them secure,
- He is a **great communicator**, and can make presentations for those in his community.

Questions

- What is the **best tool to encrypt my data** on my computer?
- How can I protect the details of patients from being stolen and leaked?
- How can I **bypass blocked content** on the Internet?

Goals

Peter's biggest concern is the **privacy** of his patients. He wants to make sure that he is using a **secure application** that can store the details of patients securely, in order to **protect their privacy**. He wants to run a society-centered organization that will preserve and protect human life and health. He would also like to have an application that can monitor the supply of government drugs in hospitals to ensure that they are adequately stocked.

#Privacy #DataSecurity

Threats

- As an environmentalist, he is at risk of being **targeted and cyber-bullied**
- He is at risk of having his **devices stolen**, which puts all of his research **data at risk**
- As a healthcare professional, he is at risk of **patients' data leaking**
